

Press Release

Subject: First ever self-storage facility in Malaysia built by Steel Storage Asia

Steel Storage is happy to announce it has successfully completed its first self-storage fit-out project in Malaysia for Extra Space located in Kuala Lumpur.

Steel Storage was involved with the project from the very beginning. Steel Storage helped find a suitable building in the Chan Sow Lin area of Kuala Lumpur, created the design, manufactured the self-storage units, and oversaw the fit-out of the units and the installation of the security system to turn a former warehouse into Malaysia's first 24/7 self-storage facility.

"After 10 years of successfully serving the significant growth of the self-storage sector in Singapore and elsewhere in Asia, we are particularly excited about this project as it will be a springboard for Extra Space and others to serve the greater Malaysian market", says Sam Peterson, Managing Director of Steel Storage Asia Pte Ltd.
